

APPLICATION DEVELOPMENT

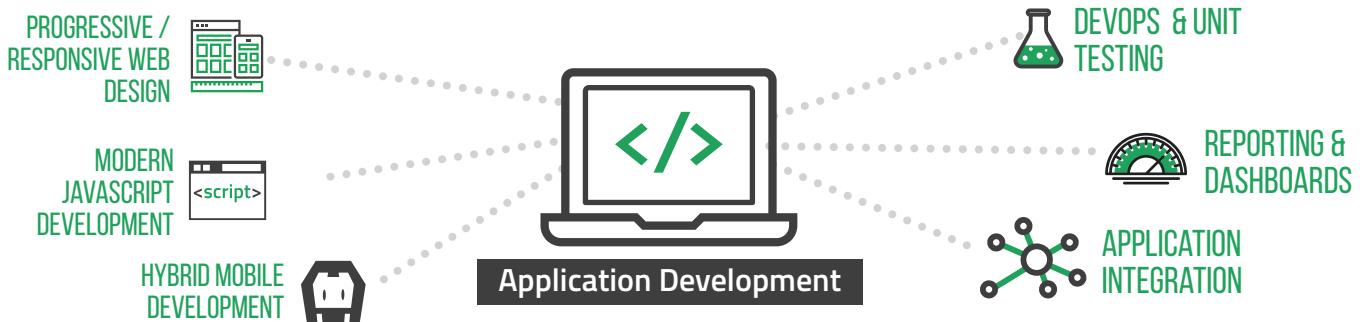

Deliver powerful applications that enhance your business.

HMB's expertise in the full lifecycle of application development will help your organization leverage technology to deliver business value in a cost effective manner. Our consultants have deep experience in capturing requirements, architecting modern solutions and managing applications. Planning, building and running custom applications is what HMB is best known for.

Our solution capabilities include:

- Full lifecycle development skills
- JavaScript frameworks such as AngularJS and React for great user experience
- Strong data persistence design & execution
- Automated full stack testing
- Frameworks and accelerators for application-level performance gains
- Application integration with extensible server-side capabilities

Why leverage HMB's Application Development solutions?

- 
We easily embed with your team
 Our consultants have been there, done that. We have proven methods to quickly integrate and get to work.
- 
We manage your on-going run costs
 Our Development Center can build, deliver, and maintain applications for an incredible value.
- 
We embrace project based work
 More often-than-not, project based work supports our client's business models and we're no strangers to working this way.
- 
We provide Advisory Services
 A good partnership doesn't stop at the project. We always provide strategic insight.
