

INFRASTRUCTURE SERVICES

Protect and streamline your core technology.

Traditional infrastructure is often related to legacy core applications using a model where the owner of the infrastructure is responsible for managing every piece of hardware and software the company uses. This is an expensive way of doing business...the old way in fact. While HMB has the experience and expertise to support and optimize these legacy environments, we also deliver holistic solutions to your business's nerve center – your infrastructure.

We can provide:

- Identity Management
- IT Service Management (ITSM)
- SDWAN Solutions
- Cloud Backup Solutions
- Cloud Migrations
- DevOps
- Monitoring & Automation
- Windows 7 to Windows 10 Migration
- Managed End Point Solutions
- BYOD – Cloud VDI

Why trust HMB's Infrastructure Services?

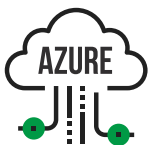

We align and engage leadership

Successful implementations require both management and teams to be aligned and engaged.

We deliver using cost-effective models

Our IT services can be delivered remotely via our Development Center using cost-effective models.

We are experienced in Microsoft Azure Cloud

We have implemented a variety of Azure solutions for clients in many industries.

We manage what we implement

As a 360-degree provider of services, we have an Infrastructure Managed Services team that monitors, administers, and supports our solutions. Because of this, we know that our solutions bring value to an organization.
