

WINDOWS 7 TO 10 MIGRATION

The Drive to 2020

January 14, 2020 marks the official end-date for usefulness of Windows 7 and Server 2008/2008r2. For companies unable to migrate to Windows 10 by this date, Microsoft will offer extended support for Windows 7, but beware: It will cost you dearly. Ever-increasing monthly fees from Microsoft could end up costing your company hundreds of thousands of dollars — or more — annually. There could also be disastrous consequences on your day-to-day operations and data security, including:

- Software, utilities and features become incompatible with upgrades
- New devices (e.g., printers, webcams) may be unable to connect with Windows 7
- Virus protection software will eventually stop supporting Windows 7
- Software bug fixes are no longer patched, leaving systems open to exploitation

Windows 10 Automated Deployment Essentials

The W.A.D.E Process

Whether you're in the early stages of planning your migration or stuck somewhere along the way, HMB's Infrastructure Services consultants can help you achieve a timely, cost-effective migration using a proven process we call W.A.D.E.

Why Trust HMB's Windows Migration Solution?

We are a Microsoft Silver Partner

When it comes to anything Microsoft, you dream it, we deliver it. We have been all things Microsoft since 1994.

We are experienced

Our Infrastructure Services team has successfully delivered thousands of Windows OS migrations for small, medium and enterprise organizations.

We have proven methodologies

HMB's proven methodologies ensure stress-free, highly-successful deliveries that help you meet your business objectives.
