

# PUBLIC SECTOR SERVICES

## Technology Services that Bring Your Legacy Systems into the Digital Age. *Better Serve Tax Payers with Better Technology.*

We find government technology leaders spend too much time “making sure things work” when they really want to be delivering the kind of technology that helps their agency best serve the public.

### We can help with both. Here’s how:

#### Technology Playbooks

Get unstuck with smart, well-constructed roadmaps and approaches to your challenges.

#### Rapid Technology Prototyping

Take a nimble, cost effective, phased approach to developing and deploying your technology.

#### Platform Development

Reduce the amount of custom development you do with low-code platform solutions.

#### Cyber Security

Never worry about the safety of your public and agency’s data ever again.

#### Modern Enterprise Transformation

Transform your systems of yesterday into the system of today to achieve more, faster.

#### Predictably Deliver Projects

Access expertise, processes and accelerators to deliver with greater certainty.

## Why do State and Local Agencies trust HMB with their technology?

### **We have extensive experience with State and Local government agencies**

We have 25 years of experience building solutions for State and Local government agencies, Pension Funds, and Higher Education organizations.

### **We know how to navigate and deliver in your unique space**

By focusing on State and Local government, HMB has extensive knowledge around budgeting and financing large IT investments and ensuring a long useful life by offering thought leadership and advisory services up front.

### **We've been there, done that**

Our consultants have helped clients do everything from rewrite or migrate existing solutions to developing complex, highly custom lines of business applications in tight timelines. There's little we haven't experienced.

## **Request your free one-hour brainstorm at your office.**

Sometimes, a quick brainstorm with our team is all you need to achieve clarity on a problem. And we love solving problems. We'd welcome the opportunity to actively work through any challenge you're stuck on. In a one-hour session, we will listen to your story, understand where you are today, understand where you want to go and provide some high-level approaches you can take to get there.
