

## TEST AUTOMATION

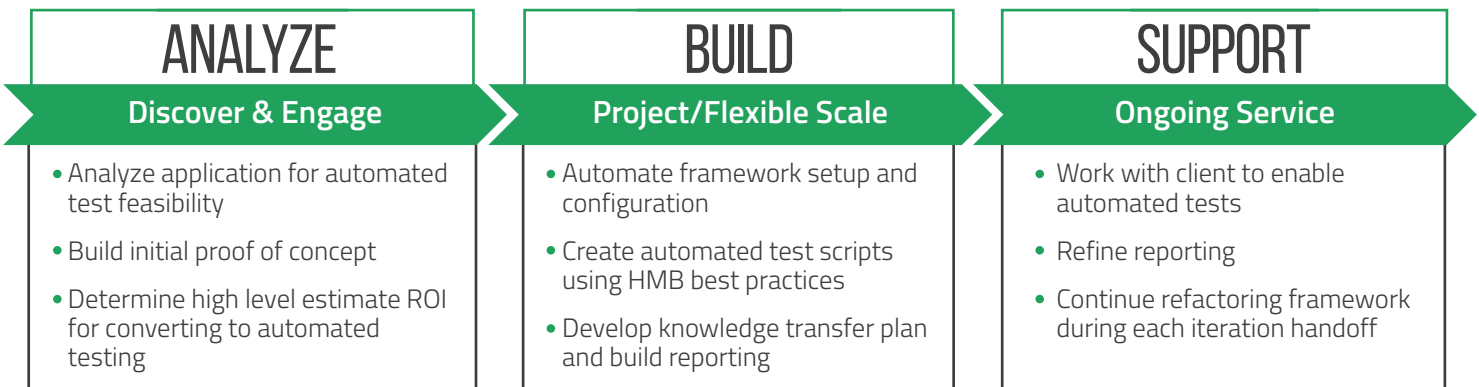

Gain efficiencies and reduce costs via automation.

For organizations looking to deliver high-quality software more efficiently, test automation is a powerful process. Skillful test automation helps IT leaders reduce the time testing can cost an organization. Automation can help lower the amount of production bugs and provide visibility into the quality of deployments.

### Our solution provides:

- Application testing analysis to discover if an application(s) can support test automation
- Test automation strategy to meet short- and long-term business and operational goals
- Multiple testing frameworks (Unit Testing, API Testing, UI/functional Testing, etc.)
- ROI calculators to ensure the right balance of automation is implemented

### HMB Roadmap for Test Automation

## WHY RELY ON HMB'S TEST AUTOMATION

### We have vast test automation experience

We've automated testing for everything from new projects to legacy systems.

### We have flexible engagement models

We have testing models that fit your unique business needs.

### We have a unique ROI model

Using our ROI model, we can develop the right test automation model for you.

### We have mature toolsets

Our experience accelerates the implementation of test automation for your project.
